Technical Support Guide

Version: 2.4

Last Updated: January 2026

Login Problems

Problem: User cannot login.

Possible Causes:

- Incorrect password
- Email not verified
- Account temporarily locked
- Multi-Factor Authentication required

Solution:

1. Verify your email.
2. Reset your password.
3. Login again.
4. Contact support if the issue continues.

Password Reset

Problem: Reset email not received.

Possible Causes:

- Wrong email
- Spam filter
- Mail delay

Solution:

- Check Spam folder.
- Verify email spelling.
- Wait up to 10 minutes.

Account Locked

Accounts are locked after 5 failed login attempts.

Automatic unlock occurs after 15 minutes.

Administrators may unlock accounts immediately.

Upload Problems

Supported Formats:

PDF, DOCX, TXT, HTML, CSV, JSON, XML, Markdown

Common Causes:

- Unsupported file
- File exceeds 100 MB
- Network interruption
- Storage quota exceeded

Solution:

Re-upload the document after verifying format and size.

Knowledge Base

Problem: AI cannot answer uploaded documents.

Possible Causes:

- Document still indexing
- Image-only PDF
- Corrupted document
- Document removed

Solution:

Wait for indexing, use OCR for scanned PDFs, or upload again.

AI Response Problems

Possible Causes:

- Knowledge Base missing information
- Ambiguous question
- AI service unavailable
- Model timeout

Solution:

Upload updated documentation and retry.

Payment Problems

Possible Causes:

- Expired card
- Insufficient balance
- Bank rejection

Solution:

Retry payment or use another payment method.

Subscription Issues

If a subscription is not activated:

- Wait five minutes.

- Refresh the dashboard.
- Contact billing support.

Order Problems

Orders can only be cancelled while in Pending or Processing status.
Shipped orders cannot be cancelled.

API Problems

401 Unauthorized -> Invalid Bearer Token.
429 Too Many Requests -> Rate limit exceeded.

Starter: 100 requests/minute
Professional: 500 requests/minute
Enterprise: Unlimited

Database Problems

Conversation history may be unavailable if:

- Database is offline
- Storage failure occurred
- User deleted the conversation
