

# SmartTech AI Support Platform

## User Manual

Version 2.4

Last Updated: January 2026

---

### Welcome

Welcome to the SmartTech AI Support Platform.

SmartTech AI is a cloud-based customer support solution designed to help businesses automate customer interactions, manage support tickets, analyze customer feedback, and provide intelligent AI-powered assistance.

The platform combines Artificial Intelligence, Retrieval-Augmented Generation (RAG), automation workflows, and enterprise collaboration tools into a single system.

This guide explains how to use every feature available in the platform.

## 1. Introduction

SmartTech AI Support Platform allows organizations to provide intelligent customer support using modern Artificial Intelligence technologies.

The platform offers:

- AI Chat Assistant
- Knowledge Base Search
- Ticket Management
- Customer Analytics
- Team Collaboration
- Automation Workflows
- API Integration
- Enterprise Security

Users can interact with the AI assistant, upload company documentation, search knowledge bases, and automate repetitive customer support tasks.

---

## 2. System Requirements

To ensure the best performance, SmartTech AI recommends the following specifications.

Minimum Requirements

Operating System

Windows 10

Ubuntu 22.04

macOS Ventura

Memory

8 GB RAM

Processor

Intel Core i5

AMD Ryzen 5

Internet

Stable broadband connection

Supported Browsers

Google Chrome

Microsoft Edge

Firefox

Safari

Recommended Specifications

16 GB RAM

Intel Core i7

AMD Ryzen 7

High-speed SSD

Latest browser version

---

### **3. Creating an Account**

To create a SmartTech AI account:

1. Open the registration page.
2. Enter your full name.
3. Enter a valid email address.
4. Create a strong password.
5. Accept the Terms of Service.
6. Verify your email address.

After verification, your account becomes active immediately.

#### Password Requirements

Minimum 12 characters

Uppercase letters

Lowercase letters

Numbers

Special characters

Passwords expire every 180 days.

---

## 4. Logging In

Users can sign in using:

Email and Password

Google Authentication

Microsoft Account

Enterprise Single Sign-On (SSO)

If Multi-Factor Authentication is enabled, users must verify their identity using:

Authenticator App

SMS Verification

Email Verification

---

## 5. Dashboard Overview

The Dashboard provides access to:

Recent Conversations

Open Tickets

Resolved Tickets

Knowledge Base

AI Assistant

Analytics

Automation

Settings

The dashboard updates every five minutes.

Widgets can be customized.

Users may rearrange dashboard components.

---

## **6. AI Support Assistant**

The AI Assistant is powered by a Large Language Model.

Capabilities include:

Answer customer questions

Search company documentation

Generate summaries

Explain technical concepts

Suggest troubleshooting steps

Draft customer responses

Translate conversations

Generate reports

The assistant always searches the Knowledge Base before generating responses whenever relevant documentation is available.

---

## **7. Managing Conversations**

Each conversation contains:

Conversation ID

Customer Name

Timestamp

Priority

Status

Assigned Agent

Conversation History

Conversations may be:

Open

Pending

Resolved

Closed

Archived

Agents may reopen closed conversations if necessary.

---

## **8. Uploading Files**

Supported file formats include:

PDF

DOCX

TXT

HTML

Markdown

CSV

JSON

XML

Maximum upload size:

100 MB

Maximum files per upload:

Uploaded documents are automatically indexed into the Knowledge Base.

Indexing typically completes within one minute.

---

## **9. Notifications**

Users receive notifications for:

New messages

Assigned tickets

System updates

Security alerts

Password expiration

Subscription renewal

Notifications may be delivered through:

Email

In-App Notifications

Microsoft Teams

Slack

Push Notifications

---

## **10. User Profile**

Users may update:

Full Name

Profile Picture

Phone Number

Language

Time Zone

Email Address

Notification Preferences

Personal API Token

Changes are saved immediately.

---

## **11. Team Workspaces**

Organizations may create multiple workspaces.

Each workspace supports:

Members

Projects

Shared Knowledge Base

Shared AI Assistant

Shared Tickets

Roles include:

Owner

Administrator

Manager

Support Agent

Viewer

---

## **12. Subscription Plans**

Starter

100 AI requests per day

Basic Knowledge Base

Email Support

Professional

Unlimited AI conversations

Knowledge Base Search

API Access

Priority Support

Enterprise

Unlimited everything

Dedicated Infrastructure

Custom Integrations

Single Sign-On

Audit Logs

Dedicated Account Manager

---

### **13. Security Settings**

SmartTech follows enterprise security standards.

Features include:

AES-256 Encryption

HTTPS Everywhere

Role-Based Access Control

Multi-Factor Authentication

Audit Logs

Session Timeout

Password Policies

Automatic Backup

All customer information is encrypted at rest and during transmission.

---

### **14. Troubleshooting**

Problem

Unable to login

Solution

Reset your password or verify your email address.

Problem

AI returns no answer.

Solution

Verify that the Knowledge Base contains indexed documents.

Problem

File upload failed.

Solution

Ensure the file size is below 100 MB.

Problem

Slow response.

Solution

Check internet connectivity or contact support.

---

## **15. Frequently Asked Questions**

**Q:** How do I reset my password?

**A:** Navigate to Settings → Security → Reset Password.

---

**Q:** How long does indexing take?

**A:** Usually less than one minute.

---

**Q:** Which files are supported?

**A:** PDF, DOCX, TXT, HTML, Markdown, CSV, JSON, and XML.

---

**Q:** Does SmartTech support SSO?

**A:** Yes, Enterprise customers can enable Single Sign-On.

---

**Q:** How can I contact support?
